Everyone speaking before Council will be required to do so in a civil manner.

Council will not tolerate personal attacks on individual council members, county staff or any person or group.

Racial slurs will not be permitted. Council's number one priority is to conduct business for the citizens of this county.

All citizens who wish to address Council and all Boards and Commission appointed by Council should do so in an appropriate manner.

NOTE: Non Agenda Item matters can be addressed except for those which, due to law or proper protocol, would be inappropriate for public meetings of Council, such as, but not limited to, partisan political activity and/or comments.

Council may make closing comments directly following the public & extended public comment sessions if time permits.

Oconee County Presentation, December 4, 2012

Oconee County Presentation, December 4, 2012

We are here on behalf of approximately 900 citizens and residents who have signed a petition opposed to Duke Energy's proposal as part of its Keowee-Toxaway Relicensing Application that will allow Duke to lower Lake Keowee another 5 ft. down to 790 ft. We think this is an important issue for Oconee County because we believe, as those who have signed our petition do, that the lowering of Lake Keowee to 790 ft. will have a devastating impact on Oconee County real estate value, hence tax revenues, local businesses and jobs. We understand that there are competing demands on the water from Lake Keowee and there may be the need for compromises but we do not feel 100% of the compromises should come out of the hides of Pickens and Oconee residents.

Against that backdrop I would like to leave you with just three points:

Why Does Duke Want to Lower Lake Keowee Another 5ft.

When we first heard of Duke's proposal to lower the water level Duke implied that the lowering of the lake was being driven by downstream water users. However, after becoming involved in this matter we realized that is probably not the case. First of all, the dumping of the lake is a onetime event; once dump the water is gone and that is all there is. Secondly, because Keowee is the 2nd smallest lake in the Savannah River basin, the actual volume water available to send downstream is small. 5ft. from Lake Keowee adds only about one-half a foot to Hartwell, Russell and Thurmond, which is nothing. Finally, Duke has relented and openly acknowledged to Channel 4 News that the lowering of Lake Keowee will have negligible impact downstream. So why does Duke want to lower the Lake? As Duke has now admitted the lowering of the lake is being driven by the nuclear plant and Duke's ability to make more money. As mentioned above, we are not against Duke making more money; we just don't think it should solely be off the backs of Pickens and Oconee County residents.

What Are The Consequences of Lowering Lake Keowee.

Duke admits that when the lake is lowered to 790 ft. that 46% of the docks on Lake Keowee will be on dry land. That's Duke's number. In Duke's own words, "we know that many private residential docks will not be usable by most boats." Lake Keowee will look like Lake Hartwell and virtually everyone except Duke believes real estate values will plummet by 30, 40 or for some as much as 50% or more. People who purchased their property under the belief and perception that the lake would be stable, a perception created and perpetuated by Duke, will be financially destroyed. Incredulously, and contrary to the belief of virtually every property owner and real estate agent in the area, Duke Representative Erin Culbert stated in the Greenville news on November 30 that, "Duke does not agree that water front property values will be adversely affected." Frankly, by making such patently and knowingly false statements Duke really loses all credibility on anything they say.

What Duke Is Doing Is Fundamentally Unfair.

Duke's real estate arm marketed and sold the property around Lake Keowee to developers and homeowners at high prices based on the belief and perception that the lake would be stable for the foreseeable future. This belief and perception was created and perpetuated by Duke to maximize its profits from the sale of real estate. Now that Duke's real estate arm has sold all its real estate, Duke's Energy arm wants to change the rules so the Duke's Energy arm can enhance its profitability. In essence, what Duke wants to do is take back part of the value sold home and property owners by lowering the lake and shift that value back to Duke in terms of high future profits, a truly ingenious double-dipping scheme if there ever was one.

Why Should Oconee County Get Involved?

First of all what Duke is doing is dishonest and fundamentally wrongful and such conduct should not be condoned. But perhaps more important to Oconee County, the lowering of the lake will cause real estate values to fall and therefore tax revenues to decline. When Lake Keowee turns into a plateau of red mud flats like Lake Hartwell, the aesthetic and recreational value of the lake to the County will be adversely affected. Local business will be hurt and jobs will be lost. Virtually every citizen of Pickens and Oconee Counties will be hurt by this proposal.

Thank you for your time.

Ms. Jen Huff
Duke Energy
526 South Church St.
Charlotte, NC 28202-1802

**Re: *Keowee-Toxaway Re-Licensing Application
Proposal to Lower Lake Keowee***

Dear Ms. Huff:

The email below exemplifies many of the communications we have received from Lake Keowee home and property owners. Many individual property owners are going to suffer significant losses, and Duke doesn't seem to care. In fact, by Duke's own estimates, 46% of the lake front property owners are faced with losing a substantial portion of their investments (their docks will be on dry land)¹. Many of these folks are retired and the loss of their life's savings will devastate them. Such indifference to the personal tragedies that will ensue from this proposal is hard to understand.

We are lake front residential property owners.

*William J and Margaret E Bruehl
18032 Cedar Cove Road
Seneca SC 29672
tel: 864 888 XXXX*

The move to lower [Lake Keowee] proposed by Duke portends disaster for us. We put our life savings into a modest lakeside property eleven years ago. With the lake down as it has been for months we have only 2 to 4 feet of water. If it goes down another five feet we will be in mud out another twenty to thirty feet from shore as is. Our pile driven dock will stand useless in mud; as will our boat. The kids will have to walk through red mud to get to water. We think the value we have had as a water side property will plummet by 30 to 40%. Moreover, the ten thousand dollars we put into dredging to give us this much water will have been a total loss.

In fact, many, many other property holders along the lake are even more threatened than we. Only the luckiest have deep water. We staked our savings and our future on the deal we bought into in 2001; to change it now is unfair and ruinous.

I know many will find no reason to support us, many with "good water" will feel a smug schadenfreude to see others hurt; but this decision will impact the quality of the lake and of the region's real estate, tourist industry, and more.

¹ Duke's 46% projection is only the tip of the iceberg. Many homeowners have installed boat lifts in their docks which require 6-8ft. of water to be operational. When Duke lowers the lake, the boat lifts will no longer be operational, and the boats will be dry docked and the docks useless.

Huff, page 2, 12/1/2012

My wife and I feel threatened and are deeply concerned...

Thank you for taking the lead in the face of this awful proposal,

Bill and Marty Bruehl (from the south end of the lake)

The fact is, as Duke clearly knows, virtually all property owners around Lake Keowee (and likely throughout Pickens and Oconee Counties) are going to take a financial hit when Duke lowers the lake level to 790 ft. AMSL.² Of course, what is so disturbing is Duke's attempt to mislead citizens with the repeated refrain: "Our models show that the lake will be down below 795 ft. only 4% of the time and down to 790 ft. only 1% of the time." The clear implication Duke is intending to convey is that it is no big deal; that the lake will not be down for any extended period of time so the impact will be minimal. However, Duke clearly knows better. Duke knows that its models are skewed and the message it is conveying is false and intentionally misleading. Duke knows that the lowering of the lake for a mere 3 days (1% of the time) has no value whatsoever. Duke knows that once down the lake will be down for an extended period, perhaps years, just like the lake has been down at or close to the 795 ft. minimum mark for nearly the last two years despite Duke's model projections that this would never occur. The Internet is redundant with climatic studies and virtually all of them indicate a slightly drier climate in the future for the foothills of South Carolina (incidentally, most studies suggest that the southern part of the Savannah River basin will remain unchanged or even be wetter). So Duke knows the use of models based on 70 year old data is meaningless. I am confident that Duke employs many people smarter than a few Lake Keowee retirees—Duke has engineers, scientists and even nuclear physicists. So when Duke intentionally attempts to mislead and fool people it evokes images reminiscent of the movies "Silkwood" and "Erin Brockovich." Duke would be far better served by being honest and forthright. No one is really being fooled; Duke knows and property owners know the truth, as one property owner so clearly articulated at the November 15 meeting: "Even if lake is down only 4% of the time, property values will be down 100% of the time."

So why is Duke so intent on including a proposal to lower the lake in its application? It can't be the pittance of additional water that would be drained downstream, although that is what Duke has vaguely implied. The calculations are not hard to do, and Duke representative, Erin Culbert, has admitted to Mandy Gaither, of Channel 4 News, that the amount of additional water drained downstream when the lake is lower will be negligible. There is just no cost-benefit analysis that justifies lowering the lake based on the amount of water drained one time downstream.

Therefore, what is suspected is that this is all part of a grander scheme that will allow Duke greater flexibility in operating its Oconee nuclear plant and thereby will enhance corporate profits.³ Please, don't get us wrong; I don't think anyone is against Duke making money. But, what we don't want is for Duke to increase its profits solely at the expense of Pickens and Oconee County property owners and residents. Because that is really what we both know lowering the lake will do: take money from Lake

² Incredulously, in a statement give to the Greenville News on November 29, 2012, Duke Spokeswomen Erin Culbert stated, "Duke Energy does not agree that water front property values will be adversely affected." When a corporation such as Duke makes such a patently and knowingly false statement it loses all credibility on anything it says. Perhaps Ms. Culbert should try to sell the fiction that lowering the lake does not lower property values to the property owners on Lake Hartwell.

³ Duke has essentially confirmed this supposition in a statement republished on the FOLKS (Friends of Lake Keowee Society) website wherein Duke admits that the operation of the nuclear plant at higher capacities is one of most important benefits of the proposal to lower the lake.

Keowee property owners' pockets (in terms of lower property values) and shift those dollars to Duke in terms of higher future profits. And, what makes this proposal so much more objectionable is the fact that most property owners, including property developers, purchased their property with the belief and perception, one created by and perpetuated by Duke⁴, that Lake Keowee's water level would remain stable. And, while Duke's real estate arm sold the property at high prices based on that perception and belief, Duke's energy group now sees the opportunity to double-dip. Duke now wants to reclaim in the form of future profits that value they sold by lowering the lake; a win-win proposition for Duke and a lose-lose proposition for property owners. Is it any wonder people are very upset at such duplicity?

So once again I set forth my plea to include true home and property owner representatives on your stakeholder committee. Home and property owners are scheduled to suffer the largest and most significant impact of your relicensing application and they have been ignored completely. It is almost as if they don't even exist (except for the month utility bill you never fail to send). Lowering the lake could mean financial ruin for some retirees (such as the Bruehl's) who may never be able to recover their investment from their homes. If Duke continues to avoid addressing home and property owners' concerns, home and property owners will be left with no alternative but to continue to seek relief from any and every forum possible⁵. In the end, we believe working with home and property owners will result in a far better and more palatable long-term outcome for Lake Keowee, property owners, Pickens and Oconee Counties and Duke.

Thank you for your consideration.

Newton E. Brightwell

Copies to: All Petition Signees; All Petition Recipients

⁴ Duke has been working on this relicensing application for the past three or more years but only advised homeowners of the plan to lower the lake last month. During this period, and for years before, Duke has been issuing dock permits for docks Duke knows will be on dry land when the lake is lowered. Duke has never disclosed this fact to prospective purchasers or dock applicants.

⁵ Our petition in opposition to Duke's proposal to lower Lake Keowee has nearly 800 signatures and more people are signing up daily. Ultimately, we believe all Lake Keowee property owners will join our opposition. At some point our elected representatives and the various regulatory authorities chartered with protecting public interests are going to respond to such wide-spread concerns and the abuse of Pickens and Oconee County residents in the name of corporate profits.

Ms. Jen Huff

Duke Energy

526 South Church St.

Charlotte, NC 28202-1802

Dear Ms. Huff:

I want to thank you for your presentation to the FOLKS forum last night.

I am sure you detected that the crowd was very disturbed about the prospects of Lake Keowee dropping to 790 ft. for an undetermined period, perhaps even months or years. The loss in property value for individuals is very real and very upsetting. I am sure that if you were being potentially threatened with the loss of 20 to 30%, or even more, of your home value you would be very upset too. And, of course, since this loss on an individual basis has essentially been ignored, the perception is that Duke is totally insensitive to this loss.

Many of the folks that live on Lake Keowee are retirees who have worked and saved their entire lives to be able to live on the lake, and bought on Lake Keowee specifically because they believed and were informed it would remain stable for the foreseeable future. Now they are being threatened with loss of a significant portion of their life savings. Your repeated refrain that your models indicated that the lake would be down below 795 ft. AMSL only 4% of the time did not do much to assuage their concerns.

One reason that the statement is not very reassuring is that you have not defined the terms, and, as I am sure you know, when used in broad and undefined terms statistics such statistics can be manipulated to support almost any position. So is it only 4% of the time in any single year, or is it 4% of the time every hundred years, or thousand years? Four (4%) percent of infinity is still infinity. The definitions you use make a very big difference and as you admitted 4% of the time could easily be one year or even multiple years. I believe that if your application stated unequivocally that the lake would never be down more than 4% of the time in any given year that limitation would be something with which people might be able to live and accept. Is this a compromise that you might consider?

I recall that someone suggested that a study be undertaken to assess the economic impact on Lake Keowee property owners and you indicated that a broad base study involving eight or more counties had been completed and that the study showed the economic implications of lowering the lake only 4% of the time to be relatively small. I would suggest, however, as others did, that such a broad based study fundamentally distorts the impact on Pickens and Oconee counties and most particularly Lake Keowee property owners who are likely to lose millions, if not billions. As someone so clearly stated: "Although the lake may be down only 4% of the time, our property values will be down 100% of the time." I agree with the suggestion that a new study needs to be undertaken focused solely on Pickens and Oconee Counties and specifically Lake Keowee property owners. You also might include in that

Huff, 11/16/12, page 2.

study the economic impact and costs of moving piers back and forth to "follow the water" in that this is not an insignificant cost for the 46% of homeowners you projected will find their docks on dry land.

The other issue raised regarding your models questioned whether the results were fundamentally flawed because it used data from years when the lake was artificially drained down for the purpose of Nuclear Plant maintenance. Also there was a question of whether your models used data from years when the lake was stabilized to comply with NRC restriction placed on the nuclear plant. I would suggest your models need to be revised accordingly.

Another statement you made that was rather disturbing related to the Corp. of Engineers' assessment that because homeowners on Lake Hartwell were allowed to "follow the water" with their piers that the economic impact on Hartwell home and property owners was a relatively insignificant. Have you ever driven west from the nuclear plant on Hwy 183 through Westminster and across the Currahee Bridge (Hwy 123)? Hundreds upon hundreds of docks are sitting on dry land (some still with the boats in them), and, I would venture to say those homeowners lost 50% or more in the value of their properties. I truly doubt they would agree with the Corp. of Engineers' representations that "follow the water" provided home and property owners with a reasonable alternative. I frankly find it astonishing and unsettling that anyone within the Corp. of Engineers could be so insensitive and naïve.

Finally, you indicated that input from "stakeholders" is an important part of your process although you reiterated it was not a requirement of FERC. I, however, suspect that FERC, as a governmental agent with a charter to protect the public, has a little stronger view of the need for "stakeholder" participation and signoff. In that regard, it seems to me that the one group of "stakeholders" who have the most at risk has not been appropriately represented. Many of us believed that FOLKS was protecting home and property owners' interests, but the FOLKS representatives have indicated that is not the case. So would Duke be willing to include a homeowner representative as "stakeholder" in your process? Accordingly, I would like to propose myself as a candidate for such "stakeholder" representation. Please note the following in the way of background qualifications: My education includes a Ph.D. in organic chemistry and a J.D. I am licensed to practice law in FL, LA and CA. I am also licensed to practice law before the Patent and Trademark Commission as a licensed patent attorney. For the first 25 years of my career I held various positions in the petrochemical industry including chief executive officer of Witco's Petroleum Group, which had sales of approximately \$500 million, 8 manufacturing facilities in the US, Canada and Europe and 980 employees worldwide. We sold product in 78 different countries. After leaving Witco I joined Petro-Canada and started its US operating business. Still later, I was president of Golden Bear, a 10,000 barrel day oil refiner located in Bakersfield, CA. After retiring from petrochemical industry, I took up the practice of law, working for several firms in California specializing in business transactions, real estate, technology and securities fraud. I am a certified mediator and arbitrator for three of California's largest court systems: the Los Angeles County Superior Court, the Ventura County Superior Court and the California Court of Appeals and have handled numerous cases for each court. When we resided in Connecticut, I was the part-time mayor of the community in which we lived, Saugatuck Island, CT.

Sincerely,

Dear Interested Parties:

Subject: Lake Keowee-Toxaway Hydroelectric Relicensing Application

Attached is a copy of a petition with 600+ names that has only been circulating for 1 ½ weeks and is anticipated to gain significant, if not unanimous, support from Pickens, Oconee, and other South Carolina Counties as well as from residents of Georgia and North Carolina who enjoy the recreation use

of Lake Keowee. This earlier copy is being forwarded to you to give you a heads up on the issue which we believe will have a huge impact on Pickens and Oconee County property owners and Lake Keowee users while providing minimal benefits to Duke Energy and downstream stakeholders. We will update you as the petition gathers more signatures.

Approximately 250 homeowners from Lake Keowee met on November 15 with representatives from Duke Energy and were uniformly frustrated by Duke's apparent lack of interest in the homeowner's concerns with property values.

Thank you for taking the time to review this matter and for your support in saving Lake Keowee and Pickens and Oconee Counties from unnecessary recreational and financial impact.

Sincerely,

Lake Keowee Property Owners

Dear Dr. Brightwell:

Thank you for sending me a copy of your letter and petitions that you sent to Ms. Jen Huff with Duke Energy. I appreciate your making me aware of the Duke proposal regarding the water level proposed for Lake Keowee and for making me aware of the specific concerns that you and others have about the water level and its effect on the value of the lake properties. I will certainly communicate my support for your position to Duke Energy.

Thank you again for being in touch with me. Please do not hesitate to call whenever I can be of service.

With kindest regards, I remain

Sincerely,

A handwritten signature in black ink that reads "Larry A. Martin". The signature is written in a cursive style with a large, sweeping initial "L".

Dear Interested Parties:

Subject: Keowee-Toxaway –Relicensing Application

The purpose of this communication is to express our opposition to the Keowee-Toxaway Relicensing provision that will allow Duke Energy to lower the level of Lake Keowee from the current minimum of

PETITION REQUESTING THAT DUKE ENERGY REMOVE FROM ITS KEOWEE-TOXAWAY RELICENSING APPLICATION THE PROVISION ALLOWING DUKE TO LOWER LAKE KEOWEE TO 790 FT. AMSL

795 ft. AMSL (average mean sea level) to 790 ft. AMSL. Although there are a number of reasons for this opposition, the primary reason is as follows:

The provision allowing Duke Energy to lower Lake Keowee to 790ft. AMSL provides minimal benefit for Duke Energy and some downstream stakeholders, while the consequences for Lake Keowee home and property owners are monumental. The disproportionality between the relatively insignificant potential benefits to a diverse group of stakeholders compared to the lopsided, substantial and potentially devastating impact on Lake Keowee home and property owners makes this provision change fundamentally unfair and unduly burdensome.

Background.

For safety and other reasons related to Duke's Oconee Nuclear Power plant, the Nuclear Regulatory Commission and Duke Energy have previously established 794.6 ft. AMSL as the minimum safe operating level for Lake Keowee.¹ To maintain a small margin of safety, Duke has operated Lake Keowee between full pond (800 ft. AMSL) and 795 ft. AMSL since construction of the nuclear plant in 1973 (except for periods of maintenance).

According to Duke, "One of the components in the current [draft Keowee-Toxaway relicensing] application is a proposal to modify [the] Oconee Nuclear Station to allow it to continue safely operating with Lake Keowee as low as 790 ft. above mean sea level (AMSL) or 10 ft. below full pond. This modification would ensure Oconee Nuclear Station can continue to provide 2,538 MW of electricity to the region and allow Duke Energy to provide water releases to support downstream water needs during periods of severe drought. Based upon [Duke's] computer modeling, [Duke] expect[s] Lake Keowee would be at or above 795 AMSL (approximately today's current minimum lake users are accustomed to) 96% of the time, an improvement over existing operations. The remaining 4% of the time would occur during severe droughts during which adjoining property owners, water users, other lake users, and Duke Energy would all be adversely affected by the drought. Duke Energy recognizes some pier owners could be affected by reservoir levels during droughts...."²

Duke's relicensing plan explicitly ignores some of the most substantial costs of lowering the lake to 790 ft. AMSL, namely, the financial impact on Oconee and Pickens county property owners. We understand from participants³ in prior meetings with Duke, that Duke has stated as many as 46% of the property owners on Lake Keowee will be adversely affected. Their docks will be on dry ground.

What Duke also has not explicitly acknowledged in its filings is that Duke's drought protocol models are based on 50 year old data⁴, and that the data does not take into account changing weather and climate patterns resulting from global warming or other causes.

¹ The Oconee Nuclear Power plant, unlike many other nuclear facilities, relies on lake water to cool its three nuclear reactors.

² Email from the Duke's Keowee-Toxaway Relicensing Team, dated November 2, 2012.

³ Provided by FOLKS representatives who have participated in meetings on the subject with Duke.

⁴ Information provided by FOLKS.

PETITION REQUESTING THAT DUKE ENERGY REMOVE FROM ITS KEOWEE-TOXAWAY RELICENSING APPLICATION THE PROVISION ALLOWING DUKE TO LOWER LAKE KEOWEE TO 790 FT. AMSL

Finally, what Duke's filings have not acknowledged is that Duke's estimated 4% drain down periods, which would translate into approximately 15 days per year, does not mean nor would it require Duke to limit the time below 795 ft. AMSL to only 15 days per year. In fact, Duke, at Duke's discretion, so long as Duke's historic metric's indicated "drought conditions" could keep the lake down for months or even years.

Consequences versus Benefits.

Although Duke contends that the ability to lower Lake Keowee another 5 ft. would allow Duke to sell a small amount of additional power and water to downstream users, the actual benefits of lowering Lake Keowee are relatively small. One reason the benefits are essentially insignificant is that the lowering of the level of Lake Keowee is a one-time event during drought conditions. Once the lake is lowered there is no additional water above normal rainfall available to send downstream. To have additional water available to send downstream, Duke must refill the lake. To refill Lake Keowee back up to 795 ft. AMSL requires the same amount of water to be held back during the refilling period that was originally drained downstream to lower the lake to, i.e., the refilling the lake requires a pay back of the water drained. In other words, net-net, the amount of water drained and the amount of water held back to refill the lake is equal. During the refilling period Duke would have to suspend production of electricity by the same quantity that Duke generated during the draining period. Downstream beneficiaries would lose the same quantity of water trickling downstream during the refilling period when discharges necessarily would have to be suspended that they received during the draining of the lake. The net effect of draining the lake is zero assuming the lake is refilled.

Another reason the lowering of Lake Keowee an additional five (5) ft. will have minimal benefit downstream is the fact that Lake Keowee⁵ is the second smallest of the lakes that service the Savannah River basin. A five (5) ft. drop in the level of Lake Keowee raises the level of the downstream lakes (Hartwell, Russell and Thurmond) a mere 0.6 ft., virtually nothing.

On the other hand, the consequences to Lake Keowee home and property owners of lowering Lake Keowee to 790 ft. AMSL is substantial and for some home and property owners will be devastating. In other words, all the costs and burden of this proposed change will fall on Lake Keowee home and property owners who receive no benefit whatsoever from the change. Such a lopsided arrangement is fundamentally unfair.

Those who purchased property on and around Lake Keowee purchased said property with the reasonable belief that the lake would continue to operate within the relatively stable guidelines it had operated since the installation of the nuclear plant. The reality is that for many the stability of the lake was a significant consideration, and so long as the nuclear plant existed there was no reason to believe that the Lake Keowee levels would not remain stable in the foreseeable future. Specifically, at no point did Duke inform prospective purchasers that Duke intended to seek to lower Lake Keowee to 790ft. In fact, arguably, Duke continues today to perpetuate the belief that the lake will remain stable within the

⁵ Jocassee 7565 acres; Keowee 18,500 acres; Hartwell 56,000 acres; Russell 26,650 acres and Thurmond 70,000 acres.

PETITION REQUESTING THAT DUKE ENERGY REMOVE FROM ITS KEOWEE-TOXAWAY RELICENSING APPLICATION THE PROVISION ALLOWING DUKE TO LOWER LAKE KEOWEE TO 790 FT. AMSL

800 to 795 ft. range for the foreseeable future by continuing to issue dock (pier) permits for properties where, if the water level were to be lowered to 790 ft., any dock on that property would be on dry land and navigable access to the property will not be possible. For those who will be so affected the value of their homes and property could be significantly diminished. Property values losses could reach millions, if not billions, for Lake Keowee home and property owners. Pickens and Oconee counties will lose tax revenue as property values decline and owners seek re-assessment. The loss in property value will take place even if the lake is lowered only once because the affected properties will be required to disclose that during periods when Duke decides to lower the lake, their docks will be on dry land and the property will no longer have navigable water access.

Although those in shallow coves will be affected the most, adjacent property owners will also be impacted. Duke clearly recognizes that numerous property owners will be impacted by including in the draft application "a proposal to allow pier owners to 'follow the water' (i.e., temporarily move docks out into the lake to allow continued boating use) during these time periods."⁶ But who is going to pay for building the dock extensions and pulling up the anchor stakes and relocating the docks? And then who is going to pay to move them back – Lake Keowee home and property owners. These docks are major structures and moving them is no easy task. The costs to move the docks will cost home and property owners thousands of dollars (for all affected property owners you are talking about hundreds of thousands to millions of dollars every drought), all borne solely by home and property owners that receive absolutely no benefit from the permit provision change. Additionally, the decline in value of the many affected properties will drag down community values as a whole. Properties not even on the lake will lose value. Home and property owners will lose millions, perhaps even billions, and Oconee and Pickens counties will lose millions as property values decline, all so Duke can make a relatively small one-time discharge of water downstream.

Other Grounds for Opposition.

1. Water Quality Will Decline Substantially.

A five (5) ft. reduction in level of Lake Keowee will expose acres and acres of mud flats while at the same time contracting the navigable acreage of the lake. The result will be a significant increase in wave action washing the mud into the lake thereby substantially increasing turbidity and adversely affecting water quality.

2. Fish and Wild Life Habitat Will be Destroyed.

The exposed mud flats and increase in lake turbidity, as noted above, will destroy fish spawning grounds and the breeding ground for migratory birds and other wildlife.

3. The Recreational Value of the Lake Will be Diminished.

The lowering of Lake Keowee another five (5) feet will reduce the lake foot print and expose mud flats. The aesthetic appearance of the lake will be hurt, and the lake will become increasingly muddy. As water quality declines so will the recreational value and use of the lake.

⁶ Email from Duke dated 11/2/2012.

PETITION REQUESTING THAT DUKE ENERGY REMOVE FROM ITS KEOWEE-TOXAWAY RELICENSING APPLICATION THE PROVISION ALLOWING DUKE TO LOWER LAKE KEOWEE TO 790 FT. AMSL

Local businesses that are based on lake recreational activities will be economically harmed and jobs will be lost. Duke's relicensing application ignores this impact.

4. Nuclear Power Plant Safety.

When Duke opened the Oconee Nuclear power plant⁷ in 1973, Duke and the Nuclear Power Regulatory Commission (NRC) determined and established that a Lake Keowee minimum level of 795 ft. MSL was necessary to adequately safeguard the public and country from a nuclear accident similar to what happened in Fukushima, Japan. Any reduction of the level of Lake Keowee below what both Duke and NRC previously determined to be necessary and optimum to protect the public from a nuclear catastrophe is an unacceptable reduction in the safety cushion provided by the Lake Keowee. Considering the fact that the Oconee plant is now 39 years old, the potential for failure of a reactor due to fatigue is more prevalent. Accordingly, the cushion of safety, if anything, should be increased not decreased. This proposal to allow Duke to lower the level of Lake Keowee places the residents of South Carolina and Georgia at unnecessary risk.

5. Lake Keowee is not the solution to global warming, changing weather patterns and population growth.

Lake Keowee is a not even a drop in the bucket when it comes to addressing the macro problems related to global warming, rising ocean levels and the issues related to demographic trends and population growth. Rising ocean levels are going to cause increased salt water migration into the Savannah River delta and a few gallons from Lake Keowee are not going "turn the tide" on that phenomena. Likewise, Lake Keowee water levels cannot impact or affect global climate changes, whatever the cause. Nor can a trickle of additional water from Lake Keowee address or impact the world's population growth issues.

6. Higher Utility Rates.

Duke will surely attempt to recover any cost associated with retrofitting the dam or power plant to accommodate lower lake levels through higher utility rates.

The bottom line is that the benefits of lowering Lake Keowee another five (5) ft. are relatively small while the harm to Lake Keowee home and property owners and the citizens of Oconee and Pickens counties is substantial. For the reasons set forth above, the provision authorizing and allowing Duke to lower Lake Keowee another five (5) ft. should be deleted from the Keowee-Toxaway –Relicensing Application.

Resource Family Program

Resource Families

As defined in this solicitation, the term "resource family" refers to families that provide temporary care that preserve and support family connections, which are critical to ensuring and enhancing the safety, permanency, and well-being of children involved in the child welfare system. In their role as providers of safe, temporary care, resource families are more involved with both the birth family and the case planning for the children in their care than what is traditionally thought of as the role of a foster family.

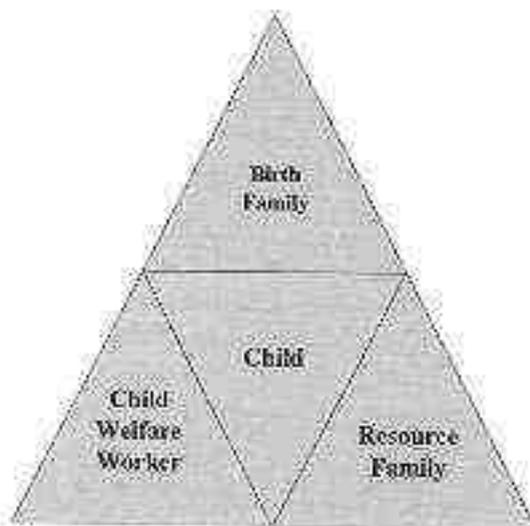

Resource families, along with many other duties, are responsible for:

- Caring for and nurturing children in foster care until they can be reunited with their parents;
- Working as reunification partners with birth families (i.e., engaging in shared parenting and maintaining connections);
- Serving as members of the team: working closely with SCDSS to ensure child safety, well-being, and permanence; and
- Becoming an alternative family resource for the child, if reunification isn't possible (i.e., engaging in concurrent planning)

The Triangle of Support

Together with SCDSS and the birth family, resource families provide the critical third leg to the "triangle of support" for children in out-of-home care. The triangle of support is the relationship between the birth family, the resource family, and the child welfare worker that surrounds the child and works toward the best interest of the child, including positive permanency.

The triangle of support is a relatively new concept and in many ways it redefines the role and responsibilities of a traditional foster parent/family. Outside of extremely extraordinary circumstances, gone are the days

where a child is removed from the parent's custody and placed in a foster home in a location unknown to the parents; where birth families are not allowed to have contact with the child in the foster home; and where the foster family only provides for the physical needs and placement of the child. Instead, in the resource family model, the resource family is willing and trained to work with the birth family and the child welfare worker to support the reunification process. When reunification with the birth family is not the permanency plan, the resource family is the family resource for the child until permanency is achieved, and may themselves become the child's forever family.

There is a great deal of professional literature, as well as internet chat-room and blogs, about the torn loyalties children face when they feel that they have to make a choice between their birth families and their foster (resource) families. A meaningful relationship between the two (2) families can help minimize the child's belief that they must make that choice. A strong birth/resource family relationship can also lessen the defensiveness a birth family feels about another family caring for their child, and dispel negative beliefs, biases, and even fears that the resource family might have about the birth family. Together, with the support and involvement of the child welfare worker, the triangle of support builds a dynamic alliance among those who care for and are important in the child's life: their birth parents, the resource family, and their caseworker.

The triangle of support can be a powerful instrument in achieving child permanency, safety, and well being; however, it is not without its challenges. Creating a strong triangle of support often requires some or all of the parties involved to adopt new attitudes and practices for working together. Resource families must be willing to take on the responsibility of serving as mentors and role models to birth families. Fears and tensions that naturally occur between the birth family and the resource family must be addressed openly and honestly. The child welfare worker must open their minds to trusting the resource family as part of the professional team.

Resource Family Program

**Have you ever considered taking care
Of a child in Foster Care?**

- ***You can help keep brothers and sisters together
- ***Become part of a team and support efforts to return children to their biological family.

"Make a difference in the life of a child"
Become a Resource Foster Parent!!

**Contact the SC Youth Advocate Program-
Resource Family Program today to learn more.

Media Release

Resource Family Program

SCYAP

Current Situation

Currently there are nearly 1000 children in DSS foster care across 10 Upstate counties. There are currently less than 500 licensed resource foster homes in those same 10 counties. There is an obvious deficit of homes available to place children in the Upstate. This decreases the number of children who can remain in their community to continue family connections and support as well as attend their home school and place of worship if applicable. This often delays permanence for children.

Background

The South Carolina Youth Advocate Program (SCYAP)-Resource Family Program, is a private not for profit organization providing services to children and families in South Carolina for over 25 years. SCYAP is working in partnership with the SC Department of Social Services to recruit, license, re-license, and support foster resource parents in 10 Upstate counties in South Carolina. Additionally, SCYAP will facilitate placement options for DSS when children enter DSS care. SCYAP provides support to foster resource families through a variety of means; 24 hour crisis line manned by trained mental health professionals, license coordination and support by foster care professionals. SCYAP partners with the SC Foster Parents Association to recruit new resource foster families through the FPA's Heartfelt Calling Program. Additionally, SCFPA provides pre-service training as well as on-going training for all resource foster families. SCYAP also partners with Miracle Hill Ministries and Connie Maxwell Children's Home for families who are interested in a faith-based approach to fostering.

Call for Action

There is an urgent need for loving, caring individuals who see the needs of children in their community, have the passion to respond to that need, and are committed to making life better for those children. Our goal is to increase the number of resource foster families in the Upstate and support children and youth in need of temporary out of home placement. The push starts here and does not stop until children are matched with a family willing to share their heart, their home and their time with a child/youth in need.

Recruiter- Betsy Gray-Manning (C) 864-357-9021

Director- Larry Cannon (O) 864-312-6700

Mailing Address: 150 Executive Center Dr. Box 67 Greenville, SC 29615

Physical Address: 300 Executive Center Dr. Suite 100 Greenville, SC 29615

***Please add the following events to your Community Calendar. We would love to speak to someone about an interview with a Foster Family and/or staff to discuss the program and the need in the different counties.**

Upcoming Events: Information Meeting- Families can learn about the changes in recruitment, the need in each area and how to take the next step to help meet the need. License Coordinators and other YAP staff will be at each meeting to help start the process of becoming a Resource Foster Family. There will be foster parents at the information meeting to answer questions and share their experience as well.

Because You Can

Why Should you Foster?

- Keep brothers and sisters together.
- Help young teens find lasting connections.
- Improve a child's chances of positive out-comes once returned to birth families.
- You just don't help a child/children, you help a family.

We all need someone to share our life, dreams, achievements and the holidays with.

**Make a difference in the life of a child.
Become a Resource Foster parent.**

What is a Resource Family?

The term Resource Family refers to families that provide temporary care that preserve and support family connections, which are critical to ensuring and enhancing the safety, permanency and well-being of children involved in the child welfare system. In their role as providers of safe, temporary care, resource families are more involved with both the birth family and the care planning for the children in their care than what is traditionally thought of as the role of a foster family.

Role of Resource Family, with many other duties:

- Caring for and nurturing children in foster care until they can be reunited with their parents;
- Working as reunification partners with birth families (i.e. engaging in shared parenting and maintaining connections);
- Serving as members of the team; working closely with SCDSS to ensure child safety, well-being, and permanence; and
- Becoming an alternative family resource for the child, if reunification isn't possible.

The Approach

The Triangle of Support

The resource families, birth family and SCDSS make up the "triangle of support" for children that need temporary out of home placement. The triangle of support is the relationship between the birth family, the resource family, and the child welfare worker that surrounds the child and work toward the best interest of the child, including positive permanency.

The resource family is trained and willing to work with the birth family. This model allows for the resource family to work with the birth families as well as the child welfare worker to ensure the best outcomes for children in care.

What you can do to get involved

- Become a Resource Foster Family
- Provide services for resource families
- Teach and help children and youth
- Help an agency
- Help birth families
- Donate goods

The Supports

- Regular visits from a License Coordinator
- On-going training to retain certification
- Local Foster Parent Association affiliation
- 24 hour crisis line
- Mentor Program for new Resource Foster Families

The term Resource Family refers to families that provide temporary care that preserve and support family connections, which are critical to ensuring and enhancing the safety, permanency and well-being of children involved in the child welfare system. In their role as providers of safe, temporary care, resource families are more involved with both the birth family and the case planning for the children in their care than what is traditionally thought of as the role of a foster family.

Role of Resource Family, with many other duties:

- Caring for and nurturing children in foster care until they can be reunited with their parents;
- Working as reunification partners with birth families (i.e. engaging in shared parenting and maintaining connections);
- Serving as members of the team; working closely with SCDSS to ensure child safety, well-being, and permanence; and
- Becoming an alternative family resource for the child, if reunification isn't possible.

The Approach

The Triangle of Support

The resource families, birth family and SCDSS make up the "triangle of support" for children that need temporary out-of-home placement. The triangle of support is the relationship between the birth family, the resource family, and the child welfare worker that surrounds the child and works toward the best interest of the child, including positive permanency.

The resource family is trained and willing to work with the birth family. This model allows for the resource family to work with the birth families as well as the child welfare worker to ensure the best outcomes for children in care.

What you can do to get involved

- Become a Resource Foster Family
- Provide services for resource families
- Teach and help children and youth
- Help an agency
- Help birth families
- Donate goods

The Supports

- Regular visits from a License Coordinator
- On-going training to retain certification
- Local Foster Parent Association affiliation
- 24 hour crisis line
- Mentor Program for new Resource Foster Families

AGENDA ITEM SUMMARY
OCONEE COUNTY, SC

COUNCIL MEETING DATE: Dec. 4, 2012
COUNCIL MEETING TIME: 6:00 PM

ITEM TITLE [Brief Statement]:

First Reading in Title Only: Ordinance 2012-37 "AN ORDINANCE AUTHORIZING THE EXECUTION AND DELIVERY OF A FEE IN LIEU OF TAX AGREEMENT BETWEEN OCONEE COUNTY, SOUTH CAROLINA AND A.I.D. COMPANY; AND OTHER MATTERS RELATING THERETO INCLUDING, WITHOUT LIMITATION, PAYMENT OF A FEE IN LIEU OF TAXES RELATED TO THE PROJECT"

BACKGROUND DESCRIPTION:

This ordinance is related to the fee-in-lieu-of-taxes agreement (FILOT) offered as part of the incentive package to A.I.D. Company for their decision to locate within Oconee County. Initiation of this ordinance is due to it being related to the incentives offered between the company and the county.

This is a standard FILOT agreement and process.

Enacted: _____, 2013

**STATE OF SOUTH CAROLINA
OCONEE COUNTY
RESOLUTION R2012-18**

INDUCEMENT RESOLUTION

WHEREAS, Oconee County, South Carolina (the "County"), acting by and through its County Council (the "Council"), is authorized and empowered under and pursuant to the provisions of Title 12, Chapter 44 Code of Laws of South Carolina, 1976, as amended (the "FILOT Statute"), to enter into agreements with any industry whereby the industry would pay fees-in-lieu-of taxes with respect to qualified projects; through which powers the development of the State of South Carolina (the "State") will be promoted and trade developed by inducing manufacturing and commercial enterprises to locate or remain in the State and thus utilize and employ the manpower, products and resources of the State and benefit the general public welfare of the County by providing services, employment, recreation or other public benefits not otherwise provided locally;

WHEREAS, the County is recruiting an investment in the County by AID Company LLC (the "Company"), in the form of a new facility for the manufacturing of bearings and rods for the aerospace industry in the County (the "Project");

WHEREAS, the Council, in order to induce the Company to locate the Project in the County, has committed to the Company that the Council will take certain actions and provide certain incentives, including entering into fee-in-lieu of taxes ("FILOT") agreement and, upon the agreement of an adjoining county, the establishment of the site of the project as a multi-county industrial/business park, which incentives provide certain benefits to the Company, if the Company locates the Project in the County;

WHEREAS, it is anticipated that the Project will represent an investment of not less than \$7 million in the County (without regard to whether some or all of the investment is included in a FILOT arrangement) and will result in the creation of approximately seventy-five (75) new, full-time jobs;

WHEREAS, the County has determined and found after considering all relevant factors and criteria as prescribed by law (with assistance, to the extent needed, from the South Carolina Department of Revenue and/or Board of Economic Advisors) that the Project is anticipated to benefit the general public welfare of the County by providing services, employment, recreation or other public benefits not otherwise provided locally; that the Project gives rise to no pecuniary liability of the County or any incorporated municipality or a charge against the general credit or taxing power of either; that the purposes to be accomplished by the Project, i.e., economic development, creation of jobs, and addition to the tax base of the County, are proper governmental and public purposes; that the inducement of the location or expansion of the Project within the County and State is of paramount importance; and that the benefits of the Project will be greater than the costs; and

WHEREAS, the County has determined on the basis of the information supplied to it by the Company that the Project would be a "project" as that term is defined in the FILOT Statute and that the Project would serve the purposes of the FILOT Statute.

NOW, THEREFORE, BE IT RESOLVED by the Oconee County Council that, if the Company locates the Project in the County and creates the investment and jobs indicated above:

1. The Council, upon request by the Company, hereby agrees to enter into one or more agreements under the FILOT Statute that will provide the Company with the benefits allowed pursuant to a FILOT agreement for twenty years for each component of the Project placed in service during the standard "Investment Period" (as that term is defined in the FILOT Statute), with the calculation of the fee thereunder on the basis of a fixed assessment ratio of 6%, and a fixed millage rate of the applicable millage rate at the Project site as of June 30, 2012, which the parties hereto believe to be 204.3 mils.
2. The Council agrees to provide the Company with the most favorable provisions allowable under the FILOT Statute with respect to the disposal and replacement of property.
3. To the extent permitted by the FILOT Statute, the Council agrees to waive the recapitulation requirements set forth in the FILOT Statute, to the extent that and so long as the Company provides the County with copies of all filings and reports which the Company is required to make under the FILOT Statute.
4. The Council agrees to enter into and execute the appropriate agreements and other documents to implement the provisions of this Resolution and such other provisions as the Company may request consistent with this Resolution and such applicable statutes.

APPROVED AND ADOPTED IN A MEETING THIS 4th DAY OF December, 2012.

PROCUREMENT - AGENDA ITEM SUMMARY
OCONEE COUNTY, SC

COUNCIL MEETING DATE: December 4, 2012

ITEM TITLE:

Title: RFP 12-05 Design Build Services for the Anderson Oconee Behavioral Health Building

Amount: TBD

FINANCIAL IMPACT:

- This project is funded by General Obligation Bonds, the amount not to exceed \$1,600,000, approved by Council per Ordinance 2012-29 on September 4, 2012.

Finance Approval: _____

BACKGROUND DESCRIPTION:

RFP 12-05 was issued on September 20, 2012, to seek qualified Design Build Contractors with the ability and capacity to design, construct, manage and provide all construction administration for a building, approximately 11,000 square feet, to be located on East North First Street and Holleran Street in Seneca. Oconee County will be the owner of the building for this construction project and Anderson Oconee Behavioral Health Services will be the occupant of the building. AOBH Services is the sole agency in Anderson and Oconee counties to provide alcohol and drug prevention, education, treatment and rehabilitation.

Thirty four firms were notified of this RFP and sixteen proposals were received on October 16, 2012. An Evaluation Committee consisting of Luke Julian, Construction and Facilities Maintenance Director, Mack Kelly, County Engineer and Director of Public Works, Kevin Robinson, Delinquent Tax Collector, and Linda Shugart, Assessor, reviewed and scored the proposals and recommended four firms to continue on to the interview Round. Interviews were held on November 26, 2012 and Roebuck Buildings, of Roebuck, SC, was recommended for award.

ATTACHMENT(S):

- I. Summary Score Sheet

STAFF RECOMMENDATION:

It is the staff's recommendation that Council approve the award of RFP 12-05 to Roebuck Buildings, of Roebuck, SC, not to exceed the total amount of \$1,600,000 budgeted for this project.

The Fiscal Impact of Selected State Mandates on South Carolina County Governments

SCAC Legislative Conference
Charleston SC
November 29, 2012

Study Conducted by:

- Francis Marion University
- University of South Carolina's Institute for Public Service and Policy Research
- Clemson University's Strom Thurmond Institute

Survey Methodology

- The survey instrument was designed using the SCAC 1993 Mandates Survey as a basis and with input from county finance staff.
- Survey data was requested for FY2009-2010 because last year audits were available for all counties.
- Survey sent to chief administrative officers and finance directors in all counties in July.

Survey Response

- 43 counties (94% response rate)
- Not all counties were able to provide estimates of the cost of all mandates.

Cost of Selected State Mandates

State Mandated Functions/Programs	\$604.2 million
Office Space & Utilities for State Agencies	\$ 20.1
Subtotal	\$624.3
Revenue from Statutory Fees and Specific State Shared Revenue	(\$312.6)
Local Government Fund County Distribution	(\$181.9)
Net Cost	\$129.8 million

Not Included in Net Cost

- Costs from Allendale, Chesterfield or Union counties
- Capital costs
- Any mandates after FY 2009-2010
- Any millage collected specifically for a state mandated function/program
- Any costs associated with Alcohol and Drug Abuse; Emergency Management; EMD Communications; Auditor; Sheriff; Solicitor; or Treasurer

Included in Net Cost Figure

Animal Shelter	Juvenile Detention
Accessories (Equipment/Software)	Libraries
Building Codes	Magistrates
Circuit Court	Nursing Facility
Clerk of Court	Medically Indigent Assistance Pgm.
Coroner (Office Space Only)	Probate Court
Court Security	Public Defender/Indigent Defense

LGF: Back to the way it was?

- LGF Base = 4.5% of prior year's General Fund
- BUT, the base changed in 1998-99
- 1995 school property tax relief for homeowners funded using state IIT and CIT
- Revenue excluded from GF base in Trust Fund for Tax Relief
- 1999-2000: LGF reduced by \$17.2 million
- 2013-14: LGF will be reduced by \$24.7 million

Local Government Fund

Other Revenue Challenges

- Personal vehicle assessment ratio dropped 10.5% to 6% beginning in FY 2001
 - 1996-97: vehicles contributed 13.2% of property taxes
 - Since 2007-08, vehicles are less than 10% of revenues from property taxes
- Overall tax burden shifting to homeowners, commercial & rental properties

Other Revenue Challenges; cont.

- Act 388 of 2006: hard millage cap
- Act 402 of 2006: 15% assessment cap
- Act 76 of 2009: up to 6 year exemption for new, unsold or unoccupied homes
- Act 179 of 2012: expanded the multiple lot discount

How You Can Help

- Schedule and invite your delegation to a formal meeting to discuss the LGF.
- Explain to your delegation members the importance of the LGF in your county service package and use the Mandate Study to show how the LGF helps offset the cost of providing state mandated services.
- Let them know the hard decisions your county has made as a result of the LGF cuts over the last few years.

How You Can Help

- Tell your delegation members the cost of state mandates in your county.
- Tell them the impact that full funding of the LGF would have on your county and their constituents.
- Ask your delegation members to support full funding of the LGF.
