Between 2012 and 2017 there were almost 8,000 collisions that resulted in 81 fatalities and over 3,000 injuries. Highways 123/76, 11 and 28 are the highways with the highest incidents of total collisions. Highways 123/76, 11 and 130 are the County's most fatal roadways. Driving under the influence and driving too fast for the conditions are the top causes of fatal wrecks in the County. Driving too fast for the conditions and failure to yield the right-of-way are the top causes of all collisions within the County. Driving too fast for conditions and driving under the influence are conditions which may be reduced utilizing a multi-department, multi-agency approach with short, medium and long-range plans and goals.
