**RE: CHILLED WATER PIPING RE-INSULATION**

Due to the fact that the chilled water piping will be in service during the re-insulation, we cannot put a guarantee on the insulation to be installed. The reason for this is that, once the insulation has been removed the pipe will sweat, which could cause damage to the quality and life of the insulation, even if installed correctly. Therefore if the piping cannot be taken out of service during the re-insulation process this work cannot be guaranteed. However if the piping can be taken out of service while being re-insulated, then the work can be guaranteed. We thank you for the opportunity to bid this project.

Sincerely,
